

DALSTROJ

QUALITY AND ENVIRONMENTAL POLICY

Dalstroj applies the following principles of quality and environmental policy:

- ensuring customer satisfaction through the delivery of high-quality products and services that comply with all requirements
- plan and conduct training of human resources at all levels of the organization according to requirements of the international standards,
- fostering a collaborative work environment for enhanced communication and cooperation
- continuously improve efficiency of processes and suitability, adequacy and effectiveness of quality, environment and safety based on the requirements of ISO standards
- leading the way in the responsible utilization of energy and natural resources for a sustainable future,
- aspiration of implementing new technologies in production aimed at reducing the amount of waste,
- considerate safe handling and substitution of hazardous materials
- establishing and enforcing protocols to minimize risks, prevent accidents, and promote environmental sustainability
- ensuring all actions comply with relevant legislation,
- implementing a comprehensive quality and environmental management system, aligned with the latest ISO 9001:2015 and ISO 14001:2015 standards, to drive continuous improvement and achieve our strategic objectives.
